PROFILE

Junior Front End Developer with hands-on experience building React SPAs using Vite, Tailwind CSS, and headless CMS. Delivered production-ready, responsive interfaces with dynamic content, media playback, and CI/CD workflows. Background in enterprise IT systems supports strong technical discipline and structured problem-solving.

PROFESSIONAL EXPERIENCE

- Freelance, Frontend Developer

Nov 2024 – Present

 - Built responsive React applications using Vite and Tailwind CSS across multiple client and personal projects
 - Implemented component-driven UI architecture supporting scalable layouts and feature reuse
 - Integrated REST APIs and headless CMS data for dynamic content and feature delivery
 - Delivered responsive, mobile-first interfaces across desktop and mobile devices
 - Configured GitHub Actions pipelines for automated builds and deployments
- Luna D.O.O, IT Engineer

Feb 2025 – Present

 - Supported enterprise systems for 20+ retail locations across four countries using ERP platforms
 - Administered server environments for 200+ users, managing virtual machines and workloads
 - Operated VMware infrastructure including vCenter, ESXi, and vSphere
 - Maintained backup and recovery processes using Veeam and NAS systems
 - Provisioned DNS zones, VPN routing, and secured Mikrotik network infrastructure

PROJECTS

- XTY — DJ Portfolio & Booking Platform

 - Built production React SPA using Vite, Tailwind CSS v3, and Sanity headless CMS
 - Developed custom audio player for mashups with interactive progress tracking and metadata display
 - Implemented video mixes gallery with YouTube-based thumbnails and category filtering
 - Built CMS-driven booking system with multiple options and Web3Forms email integration
 - Created responsive image gallery with fullscreen lightbox and adaptive grid layouts
 - Structured codebase using modular sections, reusable UI components, and shared utilities
- Olja & Andrija - Live Wedding Gallery

 - Built React and Vite web application for real-time event photo sharing
 - Implemented secure image upload, edit, and download functionality
 - Designed responsive gallery and timeline-based UI for live usage
- AJCREATIVE - Graphic Designer & Photography Portfolio

 - Built React, Vite, and Tailwind website with Sanity CMS integration
 - Implemented animated UI elements and interactive project modals
 - Designed image gallery system for portfolio presentation
- DJ Event Planner

 - Built event management web app with full CRUD functionality
 - Implemented calendar view and live UI updates using local storage
