PROFILE

Frontend Developer with hands-on experience building React SPAs (Vite, Tailwind CSS) and developing PHP/MySQL backends. Delivered responsive, mobile-first interfaces with dynamic content, media playback, and CI/CD workflows. Background in enterprise IT systems supports strong technical discipline and structured problem-solving.

PROFESSIONAL EXPERIENCE

Freelance, Frontend Developer Nov 2024 – Present

- Built responsive React applications using Vite and Tailwind CSS across multiple clients and personal projects
- Implemented component-driven UI architecture supporting scalable layouts and feature reuse
- Integrated REST APIs and headless CMS data for dynamic content and feature delivery
- Delivered responsive, mobile-first interfaces across desktop and mobile devices
- Configured GitHub Actions pipelines for automated builds and deployments

Luna D.O.O 🇭🇷, IT Engineer Feb 2025 – Present

- Administered server environments for 200+ users, managing virtual machines and workloads
- Operated VMware infrastructure including vCenter, ESXi, and vSphere
- Maintained backup and recovery processes using Veeam and NAS systems
- Provisioned DNS zones, VPN routing, and secured Mikrotik network infrastructure

PROJECTS

XTY REQUESTS - Live Song Request System ☑

- Built a mobile-first SPA using React, Vite, Tailwind CSS, and Framer Motion
- Developed PHP 8 + MySQL backend APIs for request submission and admin queue management
- Implemented Deezer API search integration, status workflows (new/accepted/played/declined), and night-code access control
- Deployed to production on Hostinger, secured environment variables, and enabled PWA + web push notification
- Implemented rate-limiting, secure .env handling, and deployment to production domain
- Enabled PWA installability and web-push notifications for Accepted/Declined (opt-in)

XTY - DJ Portfolio & Booking Platform ☑

- Built a production-grade single-page application (SPA) using React, Vite, Tailwind CSS and Sanity headless CMS
- Developed a custom audio player with interactive playback controls, progress tracking and dynamic metadata rendering
- Implemented a video mixes gallery with YouTube-based thumbnails, category filtering, and responsive layouts
- Built a CMS-driven booking system with multiple service options and Web3Forms integration for email submissions
- Created a responsive image gallery featuring fullscreen lightbox functionality and adaptive grid layouts across devices
- Architected a modular and maintainable codebase using reusable UI components, shared utilities, and section-based structure

AJCREATIVE - Graphic Designer & Photography Portfolio ☑

- Built React, Vite, and Tailwind website with Sanity CMS integration
- Implemented animated UI elements and interactive project modals
- Designed image gallery system for portfolio presentation

DJ Event Planner ☑

- Built event management web app with full CRUD functionality
- Implemented calendar view and live UI updates using local storage
